Split Fill Program Drug List

The drugs listed below are part of the Split Fill Program. This program is designed to minimize drug waste and help reduce health plan costs by targeting drugs with known high rates of early discontinuation or dose changes. Members new to therapy (those without a prescription filled in the past 120 days) for these medications are provided a partial, or "split", fill of their medication at a prorated member cost share amount for up to 3 months of therapy. Each drug is evaluated using evidence-based criteria to determine the frequency and duration of the split fill requirements.

Not all members' benefits may include coverage for the listed drug classes or programs. If you have questions on member coverage, call the number on the member's ID card.

A list of the current program medications is shown below.
